

XM Radio is a service which I pay to use. As such, it should not be restricted from providing me with local & national weather reports or local or national traffic reports by Governmental restrictions. It is providing a public service to it's subscribers. XM has a First Amendment right to provide this service to it's subscribers. XM Radio obtains it's revenue to operate from it's subscribers which is no different from NAB members obtaining their revenue from advertisers. I listen to XM because I don't want to be subjected to paid advertisements on the public airwaves. This is my right as a citizen of The United States and my choice. Government has no right to interfere with my right to choose what I want to listen to. Maybe the sponsor's of HR 4026 should try to restrict the public from listening to a telephone's dial tone. That would be more in line with their mental capacity.
